

Sterling Dental Foundation was created by Dr Amarjit Singh Khambay in 2014, with a clear mission of “Making Children Smile”. Dr Khambay’s passion is to create a better future for the next generation, and therefore Sterling Dental Foundation raises money annually for Great Ormond Street Hospital (GOSH).

GOSH is a truly unique hospital that provides care for children and young people in need of life-changing treatments. This extraordinary hospital depends on charitable support to help fund ground-breaking research, advanced equipment, child and family support services and refurbishment of the wards and medical facilities.

Sterling Dental Foundation works closely with a number of organisations who are passionate about giving and helping those in need. In particular, Sterling Dental Foundation shares a special relationship with SWS Ltd. Krish, an incredible family member and friend to those at SWS Ltd., has been looked after by GOSH for the past 14 years. Krish has an extremely rare condition called Macrocephaly-capillary malformation (MCM) that less than 300 people in the world suffer from. GOSH has helped Krish become the special individual he is today.

This year, due to the Covid-19 pandemic, we are not hosting a walk together. Instead we are asking you to complete your 5km Race in your own way (walk, run or cycle) and uploading a screenshot to your own or our JustGiving page.

You can support us in two ways:

1. Creating your own JustGiving Page and completing 5km by walking, running, or cycling. Please remember to connect your page to the Sterling Dental Foundation JustGiving Page (<https://www.justgiving.com/campaign/TeamSterling2020>). To prove to your supporters that you’ve completed the 5km, upload a screenshot to your page (we recommend using the Strava free app).
2. Donating directly to Sterling Dental Foundation via our JustGiving Page (<https://www.justgiving.com/campaign/TeamSterling2020>)

Thank you for your kind and generous support!
